DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/03/2007 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-2, 4-7 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites "the third portion further having an outer surface at least one race formed therein for alignment with an opposing race in an inner face of an annular part overlapping at least a portion of the outer surface to provide a bearing unit comprising the outer surface and the annular part to retain balls between the at least one race and its opposing race,". This limitation is generally awkward and appears to lack appropriate punctuation (it is not clear if all the recitations are features of the third portion). It is also not clear what "its" refers to.

Claim 1 recites "the third portion having integrated therein a fourth portion for mounting to a hub from which the annular part extends to overlap the at least a portion of the outer surface". It is not clear from the claim language which element has the annular part. "the at least a portion" does not appear to have proper antecedent basis.

Claim 1 recites "connected firmly to the axle case, having the fourth portion for mounting the hub". It is not clear which element has the fourth portion.
